

Sucro24

SUCRO24: A NEW PRODUCT NOW AVAILABLE IN THE USA

This sterile, maple syrup-based 24% sucrose solution, made by Inopro, has recently entered the US market.

Available now!

Preservative Free

Smooth tip that will not hurt the infant's lips

Organic Maple Syrup

BPA Free

Sucro24 is used to calm and comfort babies who must undergo painful procedures such as needle tests, exams, etc. Because young babies do not have a fixed pain threshold, early painful experiences can lead to prolonged sensitivity to pain. Administering Sucro24 can help reduce the impact of these procedures.

Made from organic maple syrup — an all-natural, traceable ingredient — this solution comes in a convenient format of 0.033 fl.oz with a sterile rounded tip to prevent injury to the baby's mouth. Sucro24 is sterile and contains no preservatives, BPA nor pesticides.
